Explore

Make a journey stick.

Journey sticks have been around for many years – they were used by Native Americans and Aboriginal people to share stories from their travels.
Go for a walk and create your own journey, then bring your stick into nursery for your child to share their story

Journey stick activity for kids - Nature Detectives (treetoolsforschools.org.uk)

Maths

Finding Groups.

This game can be played in the house or when you are out in the garden or having a walk. All you need to do is challenge your child to find groups of objects and tell you what they see - maybe three leaves on a branch, two clouds in the sky. You can do the same with small pieces of pasta or counters - scatter some onto the table or the carpet and help your child to notice groups. You could also challenge your child to find groups of a specific number of objects, such as three. Avoid asking the question 'how many?' as this can encourage counting. Instead, say, 'What do you see?'

Fine motor skills

Make a healthy rainbow fruit or vegetable kebab
Practice chopping up your fruit or vegetables using a knife safely.

Story Drawing

Read a story and ask your child to draw scenes from it.

Make some marks on the floor with chalk and then trace over the marks with paint brush and water.

Health/Wellbeing

Share this mindful exercise with your child.
